**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 March 2007.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

This office action is in response to the submission filed on 3/20/07. Claims 1-53 are presented for examination.

The text of those sections of Title 35, U.S. Code not included in this office action can be found in a prior Office Action.

Claims 1-13 and 17-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Filepp (hereinafter Filepp), (US 5,347,632) and Kikinis, (US 5,727,159) and further in view of Makipaa (us pat 6,556,217).

Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Filepp-Kikinis-Makipaa, in view of what was well known in the art.

Filepp, Kikinis and Makipaa are cited for rejection, in the last Office Action; the citations, which are applicable, are hereby incorporated by reference.

***Response to Arguments***

Applicant's arguments filed 3/20/2007 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., a UI form based on such capabilities suitable for thin client devices) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In response to applicant's argument that the prior art does not teach "client operating system and device maximum receivable packet size" upon reviewed of the specification, examiner found no explicit definition of what is the maximum receivable packet size is, therefore examiner interprets the "maximum available packet size" is the bandwidth. For example, the size of the received packet has to be smaller or equal to the maximum allowable bandwidth of the device. Makipaa discloses the device capabilities may include bandwidth ... therefore Makipaa discloses the packet size. Makipaa further discloses wide variety devices such as laptop, PDA, wireless phone; these devices may using different processors or browser versions, it is inherent that these devices having operating system (see Makipaa col.2, lines 1-23)

In response to applicant's argument that the prior arts of Filepp, Kikinis and Makipaa is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, Filepp concerned with the delivery of data to a plurality of types of the client devices based on individual characteristics, Kikinis and Makipaa inventions has similar concept of delivering content to the clients. Even though Filepp does not mention about the client is a thin client, Kikinis and Makipaa on the other hand discloses client is a thin client as pointed out by the applicant. However, the thin client is not cited in the rejected claims. Secondly, using a fat client device or other type of devices such as thin client device is a well-known concept at the time the invention was made.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2152

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
